

HRMS Automation Framework

Project Overview

This is a Selenium-based Test Automation Framework developed for testing the OrangeHRM web application. The framework is built using Java, Selenium WebDriver, TestNG, and Maven, following the Page Object Model (POM) design pattern.

Tech Stack

- Java
- Selenium WebDriver
- TestNG
- Maven
- Git & GitHub
- Page Object Model (POM)

Features

- Login functionality testing
- Invalid login validation
- Logout functionality testing
- Reusable Page Object Model
- Maven project structure
- TestNG test execution
- Configurable test data using properties file

Project Structure

```
src
├── test
│   ├── java
│   │   ├── base
│   │   ├── pages
│   │   ├── tests
│   │   └── utilities
│   └── resources
└── pom.xml
```

Prerequisites

- Java JDK 17 or above
- Eclipse IDE

- Maven
- Google Chrome
- ChromeDriver

Installation

1. Clone the repository

```
git clone https://github.com/chandanadg1172003-cmyk/OrangeHRM-Automation-Framework.git
```

1. Open the project in Eclipse.
2. Update Maven dependencies.

```
Right Click Project → Maven → Update Project
```

Running Tests

Run using TestNG:

```
Right Click testng.xml → Run As → TestNG Suite
```

Or using Maven:

```
mvn clean test
```

Test Reports

After execution, reports are generated in:

```
test-output/
```
