

Test Plan

Project Name

OrangeHRM Automation Framework

Objective

Validate the core functionality of the OrangeHRM application using Selenium WebDriver to ensure critical business workflows function correctly.

Scope

In Scope

- Login
- Invalid Login
- Logout
- Dashboard Verification
- Employee Management (if implemented)

Out of Scope

- Performance Testing
 - Security Testing
 - API Testing
 - Mobile Testing
-

Test Environment

- OS: Windows 11
 - Browser: Google Chrome
 - Java: JDK 17
 - Selenium WebDriver
 - TestNG
 - Maven
-

Test Types

- Functional Testing
 - Smoke Testing
 - Regression Testing
 - UI Testing
-

Entry Criteria

- Application is accessible.
 - Test environment is configured.
 - Browser driver is available.
 - Test data is ready.
-

Exit Criteria

- All critical tests executed.
 - No Critical or High defects remain open.
 - Test reports generated successfully.
-

Test Deliverables

- Automated Test Scripts
 - Test Execution Report
 - Bug Report
 - QA Strategy Document
 - README
-

Risks

- Browser compatibility changes
 - UI locator changes
 - Network instability
 - Test data inconsistencies
-

Assumptions

- Stable internet connection
- Test environment availability

- Chrome browser installed
- Compatible ChromeDriver version
